**Airforms, Inc. awarded new FAA PMA approvals
Baffle kits now available for 1970 - 1973 Cessna C210**

#

BIG LAKE, ALASKA, 1-June-2016 – Having been awarded numerous new FAA PMA’s over the past few months, Airforms, Inc. is once again the recipient of new PMA approvals. The latest addition to the growing line of FAA PMA’d replacement engine baffles now includes parts for 1970 - 1973 Cessna 210’s (normally aspirated). The baffles are eligible for installation on serial numbers 21059200 through 21060089, and are in-stock and ready to ship.

“The C210 family of aircraft is still immensely popular in the GA community. As we expand our baffle coverage for the 210 fleet we provide real value with improved design, superior materials and prices that are a mere fraction of the cost of OEM replacement parts,” said Steve Hunter, Airforms’ Sales and Marketing Executive. “The Airforms’ team of expert craftsmen have ensured outstanding fit and function with all of our replacement baffles, and we will continue this tradition as we continue to expand our product line.

Airforms baffles are available with either a bare metal or durable powder coat finish, incorporate design reinforcements with longer lasting materials, and feature reinforced Hi-Temp silicone seals fastened to the metal baffles with rivets. All baffles are FAA approved replacements for the original Cessna parts, and are individually interchangeable.

Airforms is the world’s leading supplier of replacement engine baffles for a wide range of general aviation aircraft; products also include an expanding line of piston and turboprop aircraft PMA parts and STCs. Airforms maintains an FAA approved manufacturing system for PMA parts, supported by an engineering department with FAA DER staff.

For more information, including a secure online marketplace and catalog, visit www.airforms.biz. Airforms’ operates from 7 AM to 7 PM CST business days and can be reached directly at 907-892-8244.
