**PRESS RELEASE**

**Airforms, Inc. awarded new FAA PMA approval**

**Cessna 208/208B Tail Tie-Down Handle**

# # #

**BIG LAKE, ALASKA, 16-Sept-14** – Adding to their growing list of FAA PMA approved parts available in support of the world’s Caravan fleets, Airforms, Inc. has announced FAA PMA approval for part number AF2612035-1, the Caravan Tail Tie-Down Handle. The part is a direct replacement for Cessna P/N 2612035-1, and is offered at pricing that greatly reduces the operator’s cost when compared to the OEM part. It is eligible for installation on all Cessna model 208 and 208B aircraft, and is a precision fit, drop-in replacement for the OEM component. Aircraft interface is unchanged, as is interface with your existing tail stand. The part comes primed and ready for installation.

Airforms’ Chief Engineer Kyle Taylor explains, “We have been working with the fleet operators to identify opportunities for potential cost savings, while providing quality components that will stand the test of daily operations in some of the world’s harshest environments. We will continue to pinpoint these needs, and to offer solutions that provide both short-term and long-term savings for our customers.”

Airforms is the world’s leading supplier of replacement engine baffles for a wide range of general aviation aircraft; products also include an expanding line of turboprop aircraft PMA parts, STCs, and hard to source parts for fleet operators. Airforms maintains an FAA approved manufacturing system for PMA parts, supported by an engineering department with FAA DER staff engineers.

For more information, including a secure online marketplace and catalog, visit [www.airforms.biz](http://www.airforms.biz). Airforms operates from 7 AM to 7 PM CST business days and can be reached directly at 907-892-8244.
