PRESS RELEASE

Airforms, Inc. awarded new FAA PMA approvals

Cessna 208/208B Crew Door Panels

#

BIG LAKE, ALASKA, 3-Sept-14 – Airforms continues to grow its line of PMA replacement offerings for the world-wide fleet of Caravan family aircraft. Airforms Part Numbers AF2615180-1 (LH Crew Door Panel) and AF2615180-2 (RH Crew Door Panel) are direct replacements for Cessna P/N’s 2615180-1 & -2. The panels are eligible for installation on all C-208 & C-208B aircraft, and the easy drop in replacement of these components on early models will bring a modern look and increased utility to the older aircraft. Airforms’ parts are identical to the Cessna part – and include retaining straps, fire extinguisher recess, large storage pocket, weight placard and certificate pouch.

“We continue to add to our PMA product offering in support of the hard working Caravan fleets around the world. Providing quality components with pricing that is affordable for the operators is our main objective. In so doing, we allow our customers to provide safe flight operations in extremely competitive markets,” said Steve Hunter, Sales and Marketing Executive. “We will continue to identify additional PMA opportunities for these fleets as we strive to support their operations.”

Airforms is the world’s leading supplier of replacement engine baffles for a wide range of general aviation aircraft; products also include an expanding line of turboprop aircraft PMA parts, STCs, and hard to source parts for fleet operators. Airforms maintains a FAA approved manufacturing system for PMA parts supported by an engineering department with FAA DER staff engineers.

For more information, including a secure online marketplace and catalog, visit www.airforms.biz. Airforms operates from 7 AM to 7 PM CST business days and can be reached directly at 907-892-8244.
